

## **Stars-and-stripes pufferfish in Singapore Straits**

**Subject:** Stars-and-stripes pufferfish, *Arothron hispidus* (Teleostei: Tetraodontidae).

**Subject identified by:** Kelvin K. P. Lim.

**Location, date and time:** Singapore Straits, on reef off Pulau Satumu (Raffles Lighthouse), facing Pulau Biola; 11 April 2012; 2005 hrs.

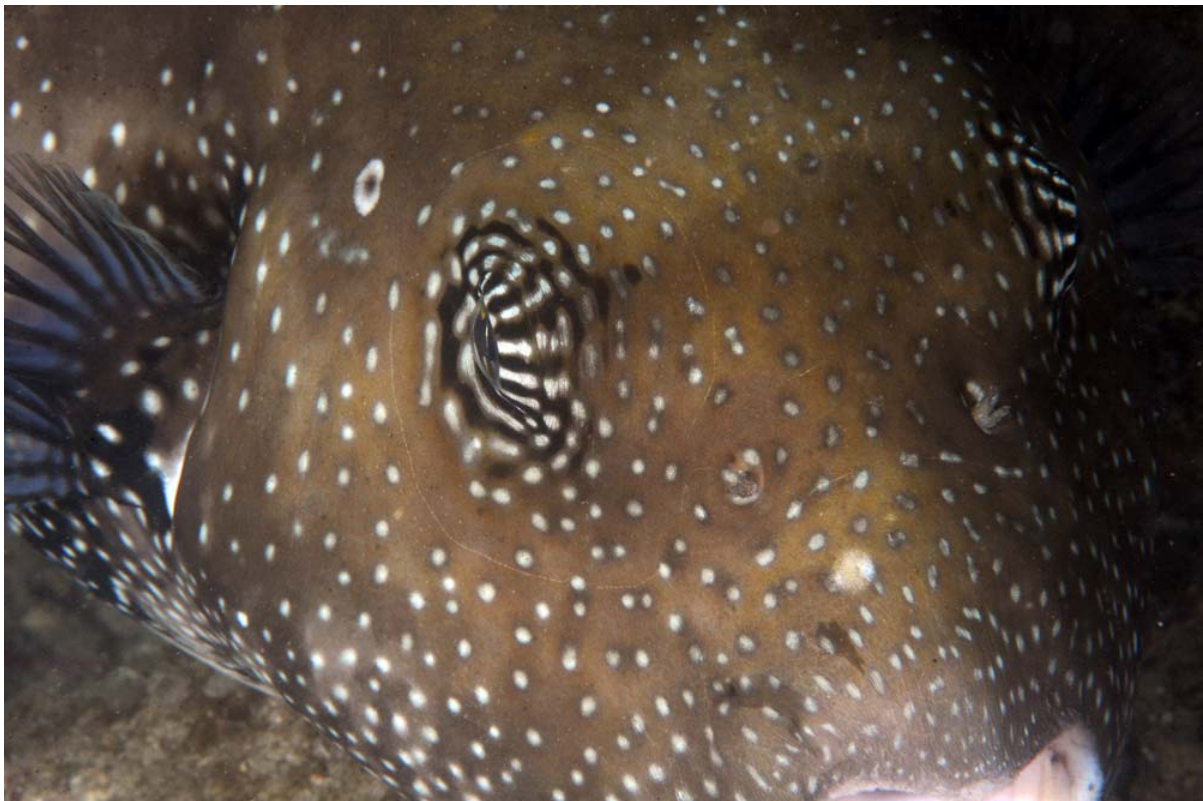

**Habitat:** Marine. Coral reef, in about 5 to 6 m depth.

**Observers:** Contributor and others.

**Observation:** This large pufferfish of about 60 cm total length, was observed hiding beneath overhanging table coral during a coral spawning event.

**Remarks:** Although the species is widespread in the central Indo-Pacific (Allen, 1997), *Arothron hispidus* has apparently not been recorded from Singapore previously. The photograph shows a frontal-lateral view of the individual's head.

**Reference:** Allen, G. R., 1997. *Marine Fishes of Tropical Australia and South-east Asia*. Third revised edition. Western Australian Museum. 292 pp.
