

CORRIGENDUM

Tan, H. H., 2013. The identity of *Betta rubra* (Teleostei: Osphronemidae) revisited, with description of a new species from Sumatra, Indonesia. *Raffles Bulletin of Zoology*, 61(1): 323–330.

An error in the morphometric measurement of interorbital width (% HL) was reported for *Betta rubra*; the correct range of values is 29.5–37.1. For *Betta dennisyongi*, it was reported as the same value for snout length; but the correct range of values is 27.6–34.2. Both corrections are set in bold below.

Table 1. Meristics and morphometric data of *Betta rubra* and *B. dennisyongi*

	<i>Betta rubra</i> Type series	<i>Betta rubra</i> Fresh material	<i>Betta dennisyongi</i> , new species
Sample size	5	10	15
SL (mm)	26.4–30.0	35.3–42.5	25.6–34.0
% HL			
Orbit diameter	23.4–26.8	22.5–27.2	24.3–30.2
Postorbital length	55.7–62.1	53.5–58.7	51.7–58.2
Interorbital width	28.9–33.3	29.5–37.1	27.6–34.2
Snout length	19.6–23.0	19.2–23.6	20.0–26.1

Acknowledgements

Thanks to Jérôme Cardot (France) who pointed out the error for *Betta dennisyongi*.
